Q: When should you start taking your child to the dentist?

A: 2 or 3 is the ideal age to start bringing your child to the dentist. Putting it off any longer than that, however, increases your child's risk for having to deal with plaque buildup or cavities at their first visit. Although some parents assume that because baby teeth will eventually fall out there's little point in caring for them, this is a huge mistake. Even though you can't see them, your child's permanent teeth are developing under her primary ones and it's important to have a dentist check to see that everything in your child's mouth is developing normally.

## \$25 Gift Card? How can I get mine?

For every new patient you refer, a \$25 gift card is sent to you!

Additionally, we are running a **New Patient Special** of \$79 which includes an exam, cleaning, and x-rays.

Thank you for allowing us to take care of all your dental needs. The highest compliment we can receive is the referral of family and friends.
